Secure Wi-Fi Instructions

NOTE: These instructions will only work on wifi/cellular connections. <u>The configuration will not work while on a wired network connection.</u>
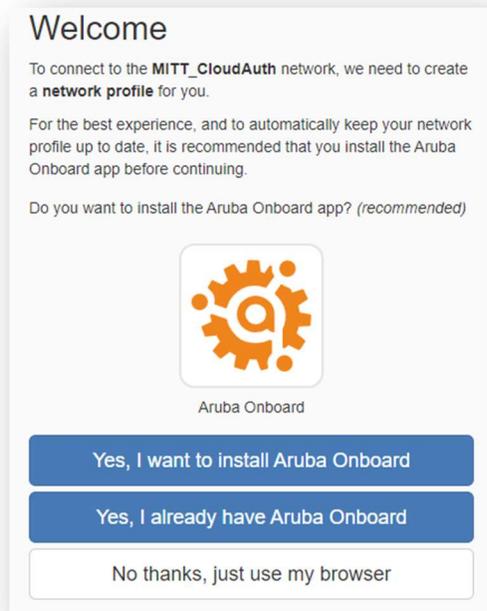

You can be connected to any Wi-Fi connection, including 'MITT Guest' to do the initial configuration.

1. Visit **https://tinyurl.com/MITTWifi**
   OR Scan the QR Code Below on your mobile/personal device (phone, tablet, laptop, etc).

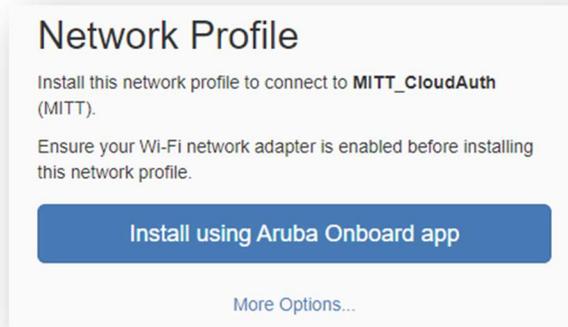

2. Choose, **"Yes, I want to install Aruba Onboard"** and proceed with the installation using the appropriate app store for your device.
   After the app is installed, navigate back to the browser screen and select **"Yes, I have the Aruba Onboard app"**
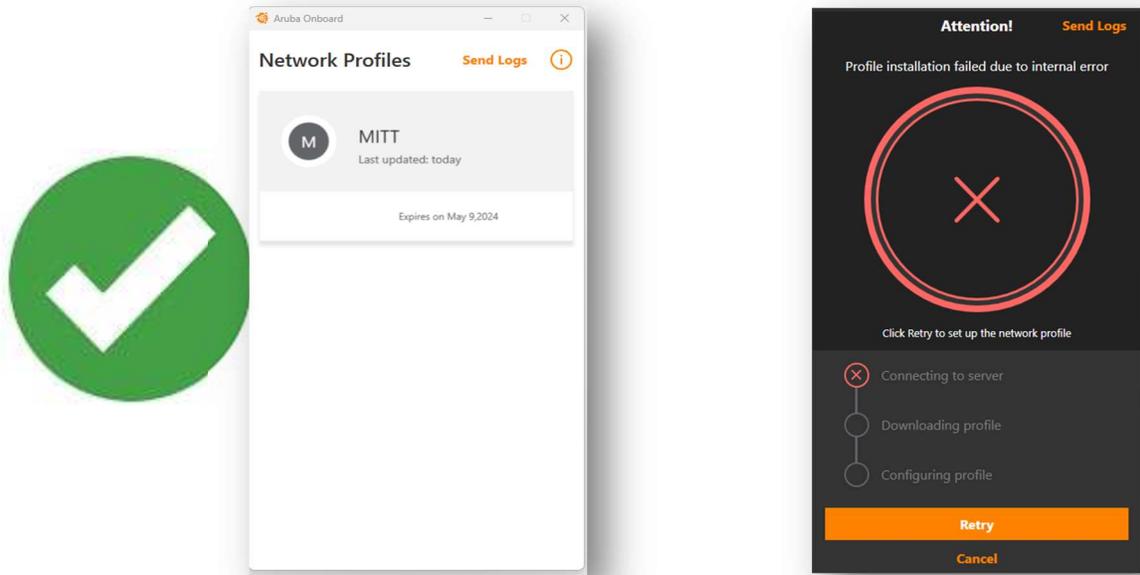

3. Choose, **"Install Using Aruba Onboard app"**

4. The Aruba Onboard App will launch, Choose, **"Set up network profile"**

Last updated: Dec 2025

5. The network profile will install and you should see the image on the left.

   *If you receive an error it is likely caused by a wired connection to the computer being detected. Please remove any docking stations/wired connections connected to the device and try again.

6. You now will be able to connect to the **MITT_CloudAuth** SSID using your MITT student email address and password. If the Wi-Fi login does not accept your username and password, click on, **"Connect using a certificate"**
